New-build battery storage projects from three developers totalling 357MW awarded contracts in Belgium's latest capacity market auction.

The project showcases how two leading players in the energy sector can work hand in hand?not only to deliver on technical requirements but also to address ESG priorities, health and safety, and project

As a partner in your energy transition, Equans can help you build your Battery Energy Storage Systems (BESS). Whether on the scale of your company, industry or town, or as part of the creation of large

Using retired electric vehicle batteries reduces project costs by 40-60% while solving waste challenges. The Li-Cycle facility in Ghent processes 20,000 batteries/year for storage reuse.

Our end-to-end electrification solution provides fleet operators and local authorities with the solutions needed for the efficient operation of electric vehicle fleets,

As a partner in your energy transition, Equans can help you build your Battery Energy Storage Systems (BESS). Whether on the scale of your company,

Discover the top emerging companies in the Energy Storage Tech Startups in Belgium, their funding activity, key investors, company highlights, and growth stages

Discover how industrial batteries and smart EMS systems drive energy transition in Belgium: cut costs, earn flexibility revenues, and meet EU targets.

The surge in demand for electric vehicles and grid storage solutions has been driven by a collective

commitment to reduce carbon emissions, enhance energy efficiency, and foster the integration of

At Voltsmile, we don't just provide energy storage solutions ? we deliver reliable, future-proof power systems backed by innovation and customer-focused service.

Our end-to-end electrification solution provides fleet operators and local authorities with the solutions needed for the efficient operation of electric vehicle fleets, including charging infrastructure, battery

LZY Energy has successfully completed more than 2,000 BESS projects around the world, with customers in Europe, the Americas, Southeast Asia, Africa and other regions.

The presence of a battery storage system on the local electricity grid ensures that local consumers are physically supplied with more green, local energy. BESS can alleviate congestion by storing surplus
