We aimed to determine which occupational exposures are associated with asthma in an eastern European country with low asthma prevalence. The Estonian Genome Center of

Occupational exposures make important contributions to asthma morbidity. The role of low/moderate level irritant exposures remains unclear. We aimed to determine which occupational exposures are

This finding, observed in a country with a low prevalence of asthma and atopy, provides new insight into the understanding of asthma heterogeneity.

Increased asthma risk was associated with occupational exposure to moderate levels of irritants in a large Estonian study. Occupational exposures importantly contribute to asthma morbidity. The role of

Occupational exposures make important contributions to asthma morbidity. The role of low/moderate level irritant exposures remains unclear.

We aimed to determine which occupational exposures are associated with asthma in an eastern European country with low asthma prevalence. The Estonian Genome Center of University of Tartu

Taking advantage of the health and environmental data collected in EGCUT, we aimed to determine whether asthma is associated with occupational exposure to: 1) well-known high and low molecular
