Curious, it lags behind the actual current price. Looking at PriceLine I see it's calling OnRender and OnMarketData, I assume I need to refactor the timer, right? Last edited by funk10101;

General platform technical support for NinjaTrader 7.

How to show a horizontal line following the current price? Hi, Is there a built in price line indicator or setting somewhere that enables a horizontal line showing current price? Thanks.

I noticed that the only indicator without a documentation page in the NinjaTrader 8 help guide is the "PriceLine" indicator, which was added back in v. 8.0.14.2. When I google

Ah okay thanks for that. I have no idea why I wouldn't use the CurrentDayOHL indicator. Didn't even cross my mind lol I was deep in a coding rabbit hole when I had the idea and

Dear Support, I am using NT8 with ticks for the ES instrument, and I would like to have an indicator that can show the Current Market Price as la line that extends from the current last

Hi, how can I change PriceLine's style (from dashed to line), width (from 1 to 2) and also change its color to Magenta in code below: `PriceLine1 = PriceLine(Close, false, false, true, 100,`

The NinjaTrader 8.1.3.0 Priceline indicator seems to be behaving strangely. On a EURUSD chart when the Forex market is closed, the data presents correctly as expected, even

Last Trade Price Open Price High Price Low Price Middle Price When toggled on, a line will appear on the chart at the corresponding price for the current session. Additionally, enabling

Hello Ousher, Where you have Low , this could be Low - TickSize to subtract a tick from the low price.
