Equipped with a robust 15kW hybrid inverter and 35kWh rack-mounted lithium-ion batteries, the system is seamlessly housed in an IP55-rated cabinet for enhanced protection against water

Our 1 GW project combines gas, solar, and battery storage to secure Kyiv's grid, cut emissions, and support critical services. Explore investment in this high-impact initiative.

Russian missile and drone barrages have pushed Kyiv into its most serious energy crisis of the war. Read more at [straitstimes](#) .

In addition, most solar PV systems, since 2023, have been installed with battery energy storage systems (BESS). Pairing distributed solar PV systems with BESS can provide ...

As Ukraine accuses Russia of trying to freeze the population into submission with its most intense attacks on the energy network of the entire war, more and more people in Kyiv are

Seamlessly combining a hybrid solar inverter and lithium battery storage, it provides a reliable, scalable, and cost-effective way to harness the power of the sun.

Located in the Kyiv region of Ukraine, this project is designed for a local factory to ensure uninterrupted production during power outages. The system comprises 4

This integrated solar battery storage cabinet is engineered for robust performance, with system configurations readily scalable to meet demands such as a 100kwh battery storage

This project is located in the Kyiv region of Ukraine and is designed for a local factory. The system consists of 4 units of 50kWh and 2 units of 100kWh energy storage cabinets, primarily to address

Kyiv backup solar cabinet system
