Project Pipeline R& D and Energy Storage Testing In 2021-2022, we tested our pressure geothermal technology in Starr County, TX, validating its potential for power generation and long-duration

Sage Geosystems Inc. is a leader in the next-generation geothermal industry, pioneering the use of Pressure Geothermal. Pressure Geothermal leverages both the heat and the

An evolution on traditional geothermal, leveraging breakthroughs in sub-surface technologies to create power generation & energy storage systems

Reach out about Sage 515 W Greens Road, Houston, TX 77067

Sage's first commercial energy storage facility ? 3MW at San Miguel Electric Cooperative Inc. (SMECI) Completed feasibility study for geothermal power generation at Ellington Field; Geothermal

Sage Geosystems reserves the right to modify or discontinue the Site at any time (including by limiting or discontinuing certain features of the Site), temporarily or permanently, without notice to you. Sage

We started Sage with the vision of a world powered by sustainable energy generated by the abundant geothermal resources of the earth below our feet. Our experience over the last 30 years helped us

Sage Geosystems" is leading the charge towards a sustainable energy future. Our innovative GeoTwin tool enhances geothermal power generation, ensuring peak efficiency.

Meet Sage: Pioneering Pressure Geothermal for 24/7 Clean Energy Learn who we are, what we're building, and why the world is ready for geothermal, everywhere.

Sage Geosystems, the company pioneering Pressure Geothermal, closed over \$97 million in Series B funding to advance its geothermal power generation and energy storage solutions,

Sage Geosystems Raises Over \$97 Million To Deploy World's First Commercial Pressure Geothermal Power Generation Facility January 21, 2026 |

Sage Geosystems develops sustainable, resilient and affordable power generation and energy storage systems using pressure geothermal technology. Learn how

Sage Geosystems (Sage) ha anunciado el cierre de una ronda de financiación Serie B de 97 millones de dólares que impulsará el desarrollo de sus soluciones de generación de

301 Moved Permanently 301 Moved Permanently openresty

La pieza central del enfoque único de Sage Geosystems para la geotermia es su tecnología patentada de geotermia de presión. Se trata de un

Sage Geosystems? is pioneering Pressure Geothermal? a new category of geothermal energy that delivers grid-scale power and long-duration energy storage virtually anywhere.
